Gender: Male **Home Language**: IsiZulu
Address: Durban, Kwa-Zulu Natal **Other Languages**: English

SUMMARY:

A highly passionate full stack software developer with experience in developing web-based applications. I have good self-management skills and able to work in an agile environment. I try to conform to good coding practices such as the use of KISS, DRY, SOLID principles which are of great importance when it comes to writing clean code.

I constantly work on improving my development expertise. Interested in learning more about software design, principles, practices, latest technologies in my field of work and get to apply what I've learnt through side projects. I enjoy taking on new challenges because I believe it is a way of learning and developing as it forces you get out of your comfort zone which exposes you to different techniques and tools.

TECHNICAL SKILLS INCLUDE BUT NOT LIMITED TO:

C#, .Net Core, Web API and MVC Source control (Git)
Front-End Development (Angular, JavaScript, HTML, CSS) Razor
Databases (SQL with MS SQL Server) Testing (unit, system)
